ECO MODEL 788

RAPIER LOOM

Eco Model 788 Tappet rapier loom has been developed mainly with the idea that most of the factories, which are still using shuttle looms and actually want to change the shuttle looms to shuttleless rapier looms, but they have to make new building or put less quantity rapier loom because normal type of rapier loom size is larger than their old shuttle looms. In order to solve this problem, we designed a new model rapier loom Eco Model 788, which occupy less space and keep same speed, this machine is suitable for making various plain fabric.
